

## I'm a Star

Objective: To use ICT to motivate pupils and raise self-esteem.

Activity: As a follow-up to circle time where objective has been to raise self-esteem and be positive about oneself and others, pupils will take digital photographs of themselves/others, write captions on word processor and then place these in a star template.

Process; Children organized to take photos of each other under supervision. These should be downloaded and printed.

Some more able children under teacher/classroom assistant guidance can download star template from <http://www.abcteach.com/basicshapes/star.htm> Print out enough copies for each child.

All children, less able first, to write some captions of things they are good at. Use a simple word processor such as Talking Write Away or Textease for those who need help. Alternatively you could have a selection of phrases prepared in a Clicker file for children to select from.

Show children how to print out their own phrases.

Children to assemble all print outs and display on wall.
